DETAILED ACTION***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: The prior art shows a seal comprising a ring having a race engagement surface, a first race engaged with a rotating element, and a second race engaging the race engagement surface (McKee, Klein et al). The prior art shows this seal as part of an apparatus comprising a stationary housing and rotor. The prior art does not show the above elements where the ring includes a pair of annular grooves and portions of the first race extend into each of the grooves. Additionally, the prior art does not show the first race engaging a portion of the rotating surface and defining a recess therein, where the second race and bearing elements are disposed in the recess. Further, the prior art does not show the first race having a substantially planar first bearing surface parallel to a substantially planar second bearing surface, where a plurality of bearing elements are disposed between the first and second bearing surfaces. It is noted that the bearing surfaces in both McKee and Klein et al are annular, not planar. Even if these surfaces were considered to be planar at a single point when view in cross section, there would be at most, a single bearing element, not a plurality of bearing elements disposed between the two bearing surfaces at such a single point. The prior art also fails to show a pair of first bearing races on opposites sides of the seal ring, a pair of second bearing races engaging corresponding races of the seal ring, and a pair of bearing cages.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
